

Payment Solutions

Enhance accuracy and efficiency. Reduce costs and compliance issues.
Build for the future with technology that works for you.

Improve Processes

We can help to streamline your payment-related processes. With technology custom-built to fit your business systems, we can help you automate your payment processes from start to finish – no matter the final payment requirements.

By streamlining the payment processes, you can:

- increase fee-based revenues
- shorten product time to market
- improve overall market response
- achieve true STP (Straight-Through Processing)

But don't just take our word for it. Read more about the successes of NCS Payment Solutions, and our proven track record in the implementation of payment and STP systems.

■ CNAPS (China National Advanced Payment System)

Several multinational banks and financial institutions have selected NCS to develop their CNAPS links to the central bank in China.

■ Clearing and Settlement System

The Shanghai Securities Depository & Clearing Corporation chose NCS to design and develop its Clearing and Settlement system.

■ STP (Straight-Through Processing)

NCS has designed and implemented an STP engine for trade matching and settling for Temasek Holdings, which owns and manages the Singapore Government's direct investments.

Optimise Operations

By centralising administration, operation and control of your payment operations, you can lower your operation and

maintenance costs, and reduce development and software costs. Consolidate multiple payment systems into one centrally-managed platform to increase efficiency.

NCS Payment Solutions can also help you eliminate redundant functions and manual processes, reducing error rates and opportunity for fraud.

■ IT Infrastructure

As a veteran platform-independent systems integrator, NCS has the long experience and the right partnerships to help deal with your information systems and payments infrastructures. We offer:

- Strategic mapping and planning
- Enterprise application integration
- Software customisation
- Project management
- Process and flow re-engineering

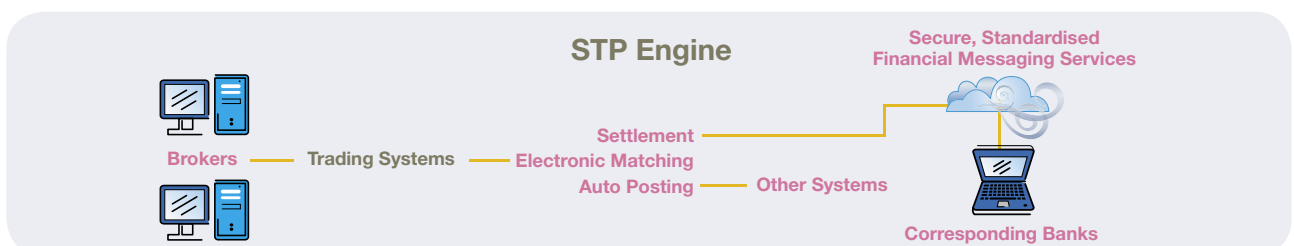

■ AML (Anti-Money Laundering)

Anti-money laundering efforts have serious consequences for banks and other financial institutions. NCS provides strong, proactive and holistic AML solutions that are customised to your needs, covering processes, technology and education.

■ SWIFT (Society for Worldwide Interbank Financial Telecommunication)

NCS is the appointed SWIFT business partner in China. Our team of SWIFT-certified professionals provide both consulting and training services, to assist you in the installation and integration of SWIFT payments system.

Furthermore, NCS has also established an STP Center of Excellence, staffed with seasoned industry professionals.
